

Chapter 13. Data Storage Structures

□ Temporal locality:

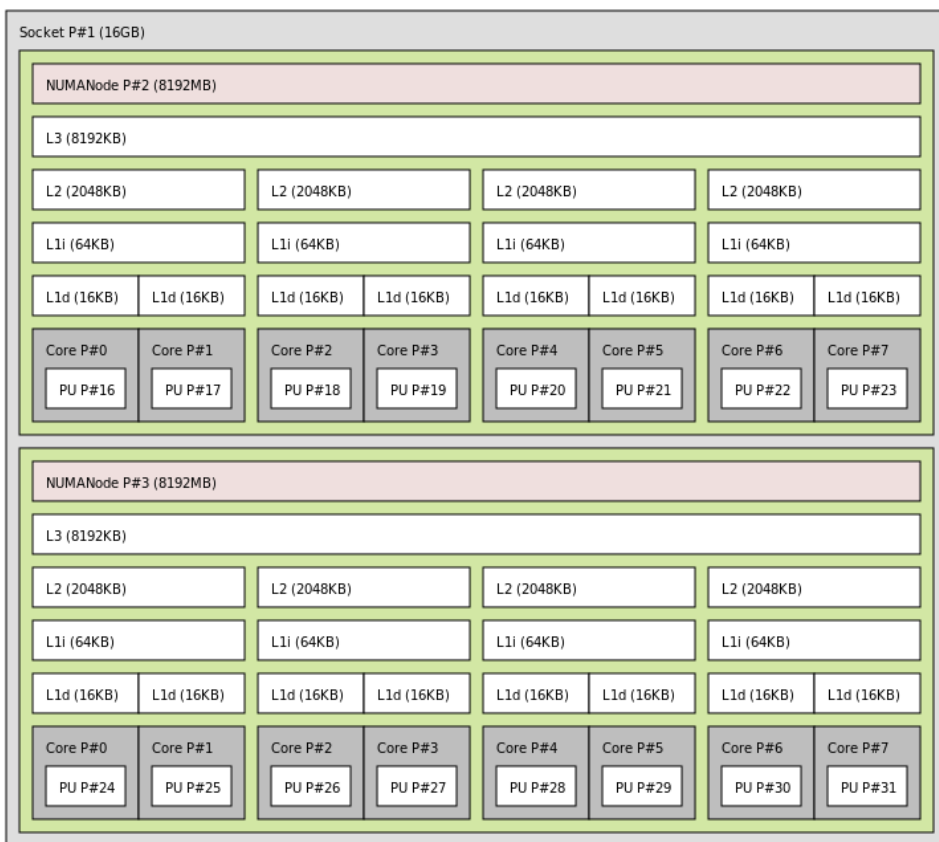

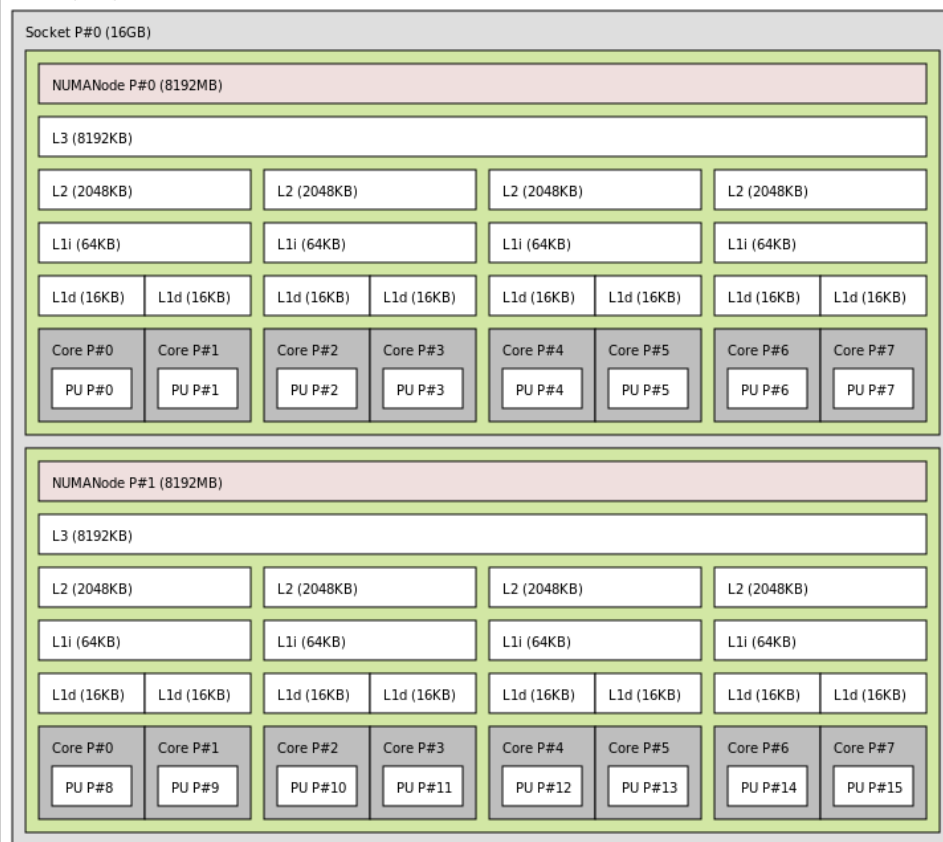

- If at one point a particular memory location is referenced, then it is likely that the same location will be referenced again in the near future.

□ Spatial locality:

- If a particular storage location is referenced at a particular time, then it is likely that nearby memory locations will be referenced in the near future.

Cache in CPU

- ❑ L1i: Level 1 instruction cache
- ❑ L1d: Level 1 data cache
